TEXTILE IN PROGRESS

OUR GOALS

INDEX

2021/2022 GOALS

- Machineries
- Professional figures
- R&D
- Company structure
- Common welfare areas
- Waste containers
- Certifications
- Digital fabric archive
- RFID System
- Energy efficiency optimization
- Model 231
- GreenLine
- 70th Anniversary

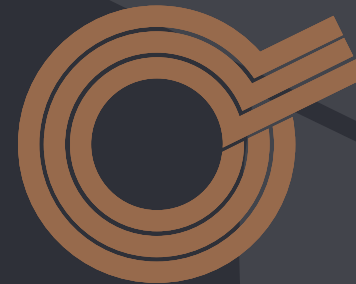

GOALS from 2023 onwards

- Machineries
- Solar panels
- Fast service in sample departments
- Sustainable production & approach
- Certifications (work in progress)
- Website restyling
- Sustainability report
- New accessories collection

GOALS

◀ 2021/22

Keywords: determination,
passion and sustainability.

Olmotex
TEXTILE IN PROGRESS

NEW MACHINERIES

WARPING, WEAVING AND PACKAGING

The purchase of **new machineries** has contributed to **improve** the **timing**, the **quality**, and to **reduce the energy consumption**.

We have recently purchased new **jacquard looms**, a new **packing machinery** and a new **warper**, giving to the company energy savings, process optimization and customization.

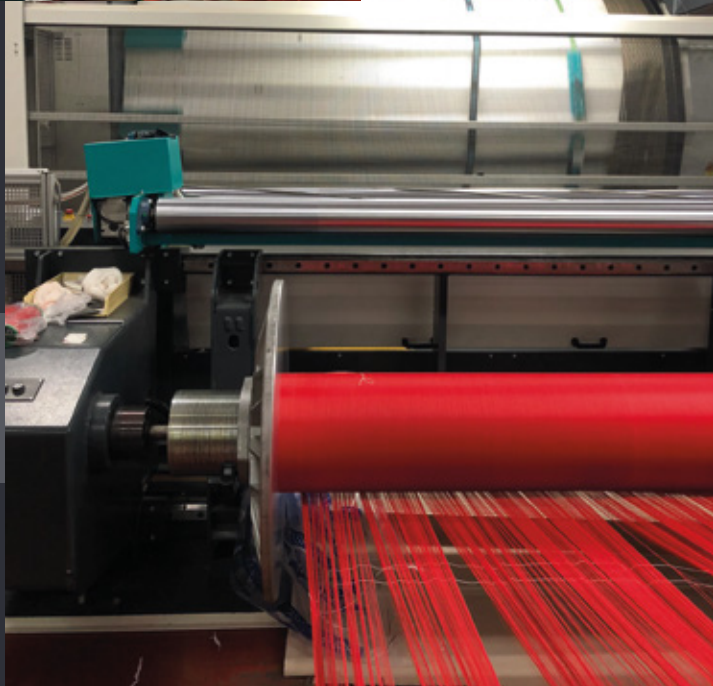

**JACQUARD

WARPER

PACKING MACHINERY

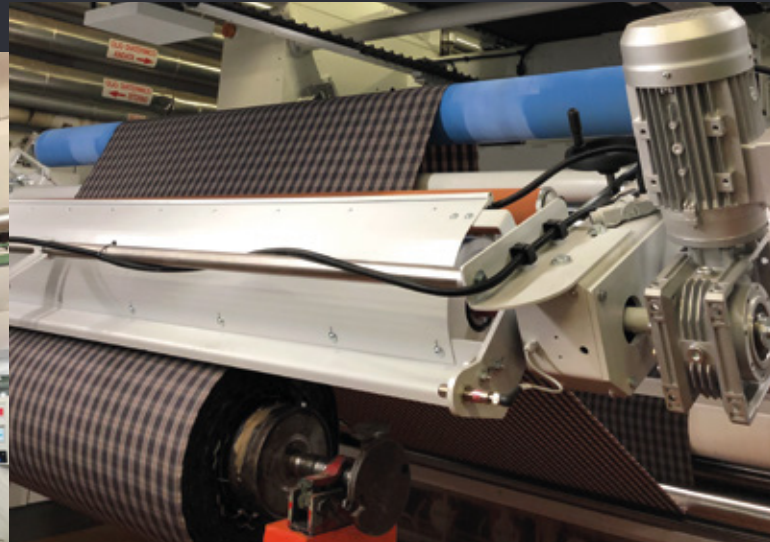

NEW MACHINERIES

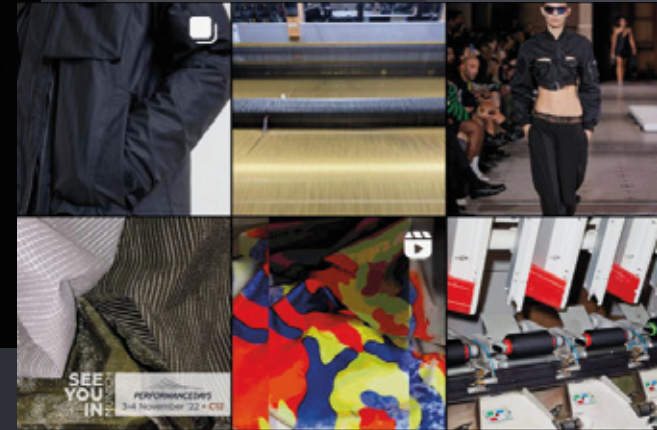

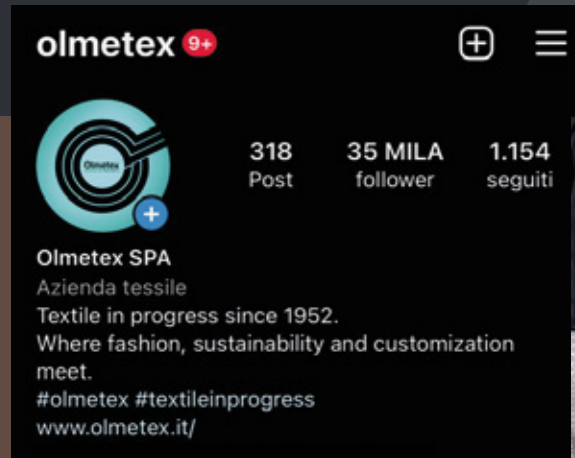

FINISHING

A new advanced **preparation machinery** in order to double the production capacity.

We also got a new double deck **RAMEUSE**, which includes a **washing line** to increase the performances, reduce the timing and improve the quality.

NEW PROFESSIONAL FIGURES

The **generational turnover** is one of the issues on which we believe the most. We're currently investing in the training of new professional figures **under 30**.

We created a new **social media team** to extend our visibility throughout the use of different media channels.

We also have new **graphic team** which offers **graphic support** to our customers and develops **co-branding strategies**.

R&D

A new team of professional product developers who works close to the customer on **new customized projects**.

“Everything you can imagine, can come true”

NEW COMPANY STRUCTURE

We studied a **new company organization**, structured in 9 independent divisions.

Team meetings are monthly scheduled with our **department managers** to discuss regarding production criticalities, optimizations and improvements.

NEW COMMON WELFARE AREAS

Relax and common areas **surrounded by greenery** dedicated to **improve the working experience** and **create team-building moments.**

NEW WASTE CONTAINERS

Olmetex has expanded the **wastage area** by **re-organizing the spaces**, in full respect of **safety** and **sustainability standards**.

CERTIFICATIONS

Since 2018, Olmetex is **GOTS**, **GRS** and **OCS** certified.
In september 2021 Olmetex achieved two **NEW** certifications:
ISO 9001 and **ISO 14001**.

Composizione prevalente:

FILTRO TOGLI FILTRI

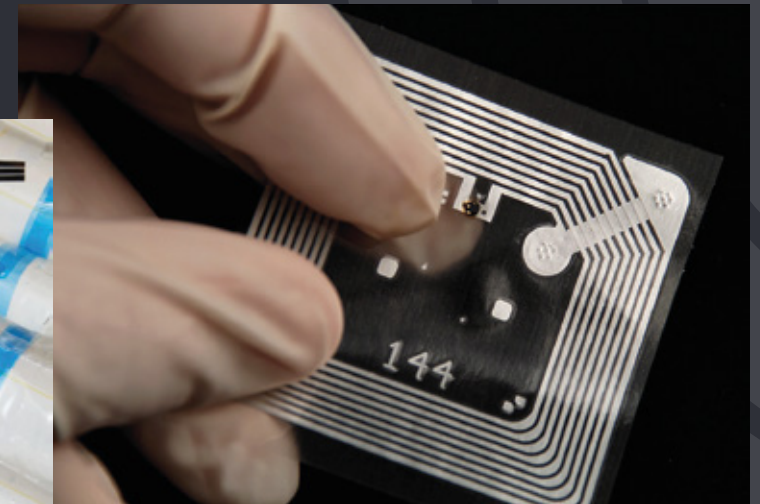

A large investment of time and resources dedicated to the **digitalization of all the Olmetex collections**: a virtual archive of all the fabrics and special items developed over the years.

DIGITAL FABRIC ARCHIVE

RFID SYSTEM

An advanced technology to fast detect the **rolls location** and speed up the shipping process.

SPEED RESEARCH
OPTIMIZATION
BETTER WORK EXPERIENCE
NEVER LOST PIECE

ENERGY EFFICIENCY OPTIMIZATION

Rooftop renovation to improve the **thermal insulation** and reduce the **energy wastage**.

MODEL 231

From September 2022 we adopted **Model 231**, which is a set of protocols that regulates and defines the **corporate structure** and the **management** of its **sensitive processes**.
If properly applied, it **reduces the risk of committing offenses**.

GREEN LINE

Thanks to the collaboration with **Green Line**, an **italian partner** involved in the collection and management of the pre-consumer textile wastage, we are able to transform the scraps of our productions in a **new recoverable resource**.

70th Anniversary

since 1952

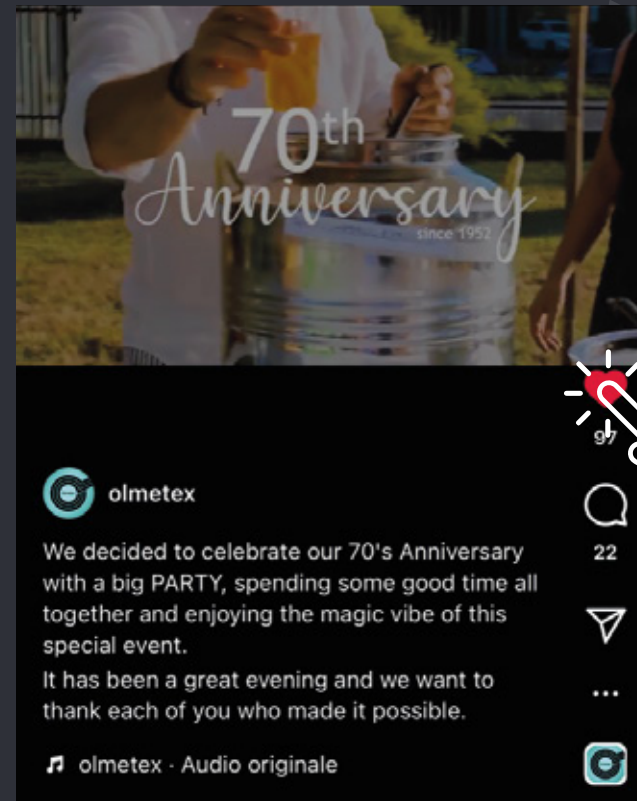

We decided to celebrate our **70th Anniversary** with a big **party**, spending some good time all together and enjoying the magic vibe of this special event.

EMISSIONS REDUCTION:

CO²

NOX

SO²

FINE DUST

We have decided to invest in a **photovoltaic system** in our production site in Orsenigo.

From the beginning of 2023, **300 solar panels** will produce energy for over **325.000 kW/h** of **power in one year**.

Thanks to the combination of the new solar panels and the co-generation system, the **70%** of the total consumption is **green**.

PHOTOVOLTAIC SYSTEM

We are constantly investing in the organization of our **sample department**, in order to **optimize the timing** and **improve the service**.

FAST SERVICE IN SAMPLE DEPARTMENTS

We are able to **fullfill requests** fastly, with **24hrs** shipping.

CUT LENGHT

COLOR CARDS

SUSTAINABLE PRODUCTION & APPROACH

Currently **our sustainable direction** made of organic and recycled items, corresponds to the **35%** of our production.

The goal is to reach the **80%** by the **end of 2025**.

ECO-PRODUCTION
ECO-FABRICS BY 2025
ECO-APPROACH

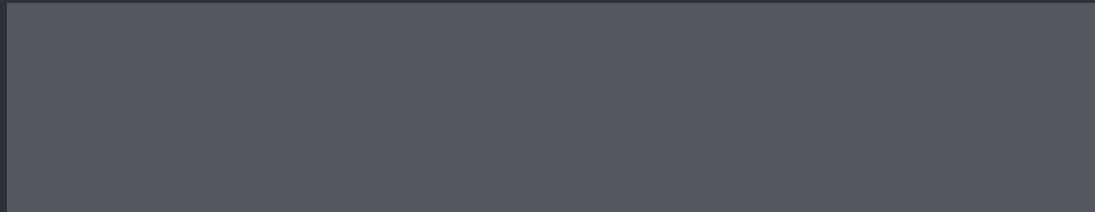

CERTIFICATIONS

work in progress

Among the goals in terms of certifications there is the achievement of the **ISO 45001**, all scheduled for the end of **2023**.

SAFETY
ISO 45001

WEBSITE RESTYLING

From the beginning of 2023, we will work on the restyling of our **website**, with a **new layout** both **functional** and **emotional**.

We decided to analyse our progress in terms of sustainability and put all the data in a **yearly report**.

The goal is to inform people inside and outside the company and, at the same time, keeping track of our progress.

SUSTAINABILITY REPORT

NEW ACCESORIES COLLECTION

We decided to enter in the world of the **accessories** and develop collections for bags, wallets and shoes.
