**RUGGERO ROSSI**

**Finest Italian Fabrics**

made in italy

### **SUSTAINABILITY IN THE TEXTILE CLOTHING FASHION INDUSTRY**

Textile productions have a significant environmental impact in terms of consumption of natural resources such as water, thermic energy, electricity and the use of chemical products.

For several years, our company has paid increasing attention to environmental sustainability, aiming to improve the health of those who produce, the final consumer and the environment.

The fabrics of the RUGGERO ROSSI Collections are entirely produced in the Villasanta headquarters (Monza Brianza).

Rossi Lorenzo e Figli is certified:

- ISO 9001: 2015 for the processes of design, development of finishing cycles and production of fabrics for clothing, certificate no. IT239833-1 issued by Bureau Veritas;
- AUA (Autorizzazione Unica Ambientale) an environmental authorization issued in September 2020 by the provincial administration of Monza and Brianza for the exercise of the industrial activity of textile finishing, this confirms that the company operates in compliance with environmental standards.

The rigorous control of the entire production chain, starting from warping and weaving and ending with the bleaching, dyeing and finishing cycles, allows the entire traceability of the fabrics of the RUGGERO ROSSI Collections.

The company management firmly believes to continue investing in new technologically advanced systems that allow production techniques that have fewer impact on the environment.
