FLUOROCARBON SURCHARGE €0.79

By initiating a design request, please note that there will be a design fee of £295 applicable for work carried out in the creation of CADs and any amendments. This fee is requested before design work starts and will be credited once the fabric order is placed. Until that point all concept design work and CAD creation remains the intellectual property of Marton Mills Co Ltd. The design fee is non-refundable and covers the design work, it can only be credited against an order of one of the fabric designs.

Please note, bespoke orders now require a 50% deposit prior to weaving. Once this payment has been received, along with yarn shade and design approval, the order will be processed.

Due to the nature of the weaving process, it is not always possible to weave the exact amount required. To achieve the minimum length ordered, it may be necessary to produce up to 15% more and the customer must be prepared to accept such additional quantity at the same price.

Piece lengths will vary depending on the weight of the fabric.
